V-Drums

New possibilities for drums, creativity begins here

Explore a new world of sound and control. The drum kit redefined. Complete freedom of expression. Experience the revolutionary power of V-Drums.

In the quest to meet the needs of every drummer, Roland continues to strengthen and expand its award-winning line of V-Drums®, while steadfastly adhering to the highest quality standards.

When you play V-Drums, you can feel and hear the quality.

Experience a new world of expression, creativity, and inspiration that only V-Drums can offer. V-Drums have become the global standard for drummers of every style and skill level.

Roland V-Drums

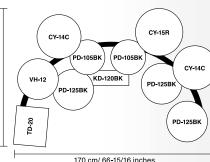

V-Pro[®] Series

Roland's Most Expressive and Dynamic V-Drums Kit Ever.

The V-Pro Series TD-20K is anchored by Roland's TD-20 module, famous for its stunning, ultra-expressive sound and powerful-yet-friendly V-Editing. The patented mesh V-Pads™ provide a comfortable, natural feel, a wide dynamic range, and authentic rimshot triggering, along with a cool look and striking finish. The V-Pro Series TD-20K also features Roland's innovative two-piece V-Hi-Hat[®] and a drum stand* designed to hide the cabling. It's the ultimate kit for the modern drummer! *Not included

Professional Quality in a Compact Kit

Great feeling, great sounding — the V-Stage Series TD-12KV makes the middle range of the V-Drums[®] line feel like first class. With mesh V-Pads™ all the way around, the TD-12KV lets drummers experience the best-feeling pads in the business. The TD-12 percussion sound module share the same sound quality as the flagship TD-20.

V-Tour® Series

Roland

Mid-Line Gets a First-Class Upgrade

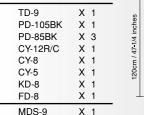

For any type of gig, the V-Tour series enables the nuance of authentic drumming and more. The TD-9 sound source delivers powerful, high-quality sound that cuts through the densest mixes. V-Tour kits also allow you to record and play along with backing songs and improve your drumming with accuracy meters. The sturdy MDS-9 drum stands provide the strength and flexibility to configure your kit exactly how you want it, and keep it firmly in place.

V-Tour Series TD-9KX

The TD-9KX, with mesh-head V-Pads, is equipped many features of Roland's top-line models, including a 10-inch PD-105 snare and CY-12R/C V-Cymbal with three-way triggering.

X 1

The MDS-9 drum stand used in the V-Tour series employs a ball clamp system for tilting snare drums and cymbals. Because it enables free rotation and fine adjustment in any direction, you can quickly set any angle you desire. *Drum stand, and kick pedal not included and shown only for photography purposes. *Connection cables are partially hidden for photography purposes.

Great performance at a nice price

With the sound quality of flagship V-Drums®, Roland's V-Compact kits are a price/performance breakthrough. The heart of this compact system is the easy-to-use TD-3 V-Drums sound module, packed with great drum and percussive sounds, plus Rhythm Coach, a metronome, and a host of great features for practice and performance. Improve your drumming skills and have fun in the process.

-Compact[®] Series

V-Compact Series TD-3KW

This kit features the 10-inch PDX-8 V-Pad for the snare drum — a pad that's expressive, accurate, and comfortable to play. The TD-3KW makes a perfect first drum kit. It's affordable, compact, versatile, and provides a comfortable and fun drumming experience.

Included with every V-Compact series drum kit is Roland's Play-Along audio CD, featuring 23 songs in a variety of musical styles. Feel like you're in the band, as you play along with the professionally recorded songs; each song is offered with and without a drum track.

Included with V-Tour/V-Compact series is a cable snake, conveniently colorcoded and securely wrapped for easy setup and reliable, ean signal transfer

TD-3KW

Easy to transport and store, V-Compact series rack can quickly fold to these dimensions: 110cm (4-3/8") Tall, 70cm (2-13/16") Wide, and 70cm (2-13/16") Deep.

Options for Adding to V-Drum Kits

V-Pro[®] Series TD-20K

Expand the TD-20K with an additional CY-5 splash cymbal pad and PD-125BK second snare pad plus mounting hardware, as illustrated in the diagram.

V-Tour[®] Series TD-9KX

Expand the TD-9KX with an additional CY-8 crash cymbal pad and PD-85BK tom pad plus mounting hardware, as illustrated in the diagram.

V-Tour® Series TD-9K

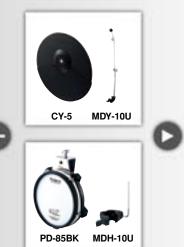

Expand the TD-9K with an additional CY-12R/C ride/crash cymbal pad and PD-8 tom pad plus mounting hardware, as illustrated in the diagram.

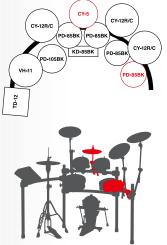

Expand the TD-12KV with an additional CY-5 splash cymbal pad and PD-85BK tom pad plus mounting hardware, as illustrated in the diagram.

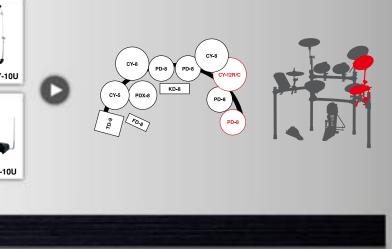

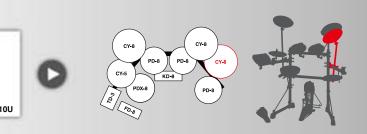

V-Compact[®] Series TD-3KW

Expand the TD-3KW with an additional CY-8 crash cymbal pad plus mounting hardware, as illustrated in the diagram.

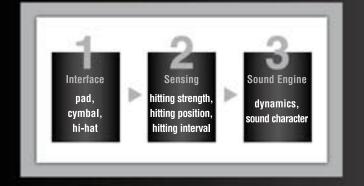

Roland V-Drums Innovation File No.01

Percussion Sound Module

Great-feeling mesh pads are only part of the V-Drums story. The heart and soul of our award-winning kits are the advanced, COSM®-modeling sound modules. The TD-series modules are unsurpassed in rich sound — both acoustic and electronic — and amazing expressiveness. Decades of extensive R&D combined with an incessant desire to be the very best has propelled Roland to the pinnacle of percussion technology.

Essential V-Drum Elements

In making the world's finest electronic drum kits, Roland has mastered these key performance elements: comfort, pinpoint accuracy, full-spectrum sensitivity, realistic positional control, and stunning sound quality. In harmony, these elements combine to create the world-famous V-Drums experience.

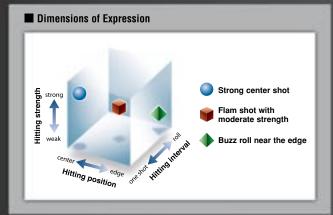

Unmatched Power, Articulation, & Sensitivity

The V-Drums magic begins with the location and strength of the stick on the pad, as well as the intervals of the strokes. From weak to strong, from the center of the pad to the edge, from single-shots to rolls, your performance data is translated with lightning-fast accuracy by the V-Drums' central processor.

*Detection of hitting position and interval is only possible on the TD-20/12

Beyond Specs — **Tapping Into the Intangible**

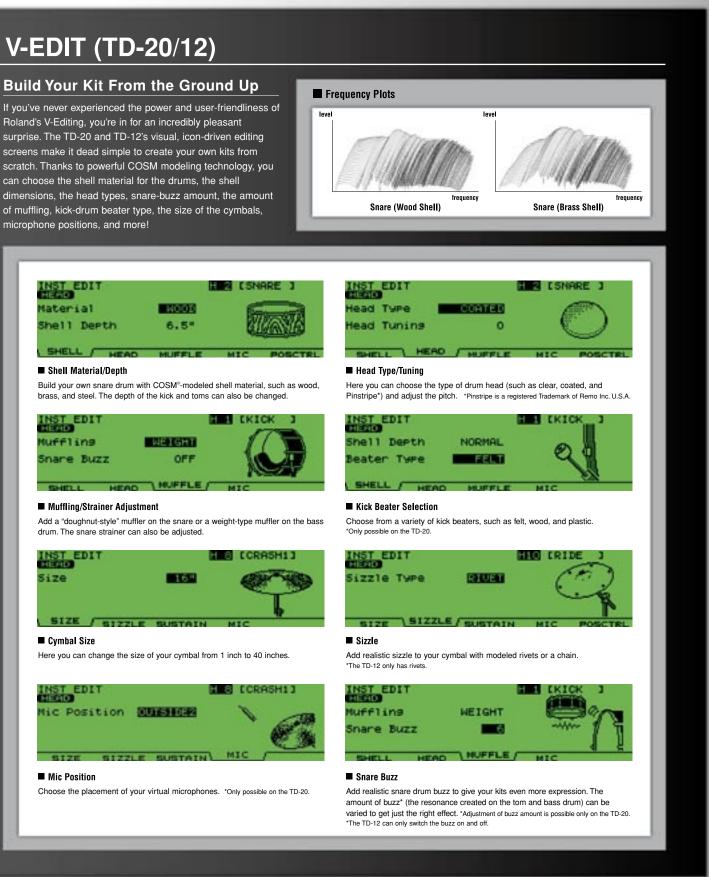

Memory size and sampling rate alone do not determine the actual sound quality of an electronic musical instrument. Roland looks at sound quality on a higher level. In addition to pristine audio capture and modeling, we believe that the quality of source instrument, the skill of the sampling-session player, the quality of the studio and recording equipment, and many other intangible factors add up to give V-Drums an unbeatable edge.

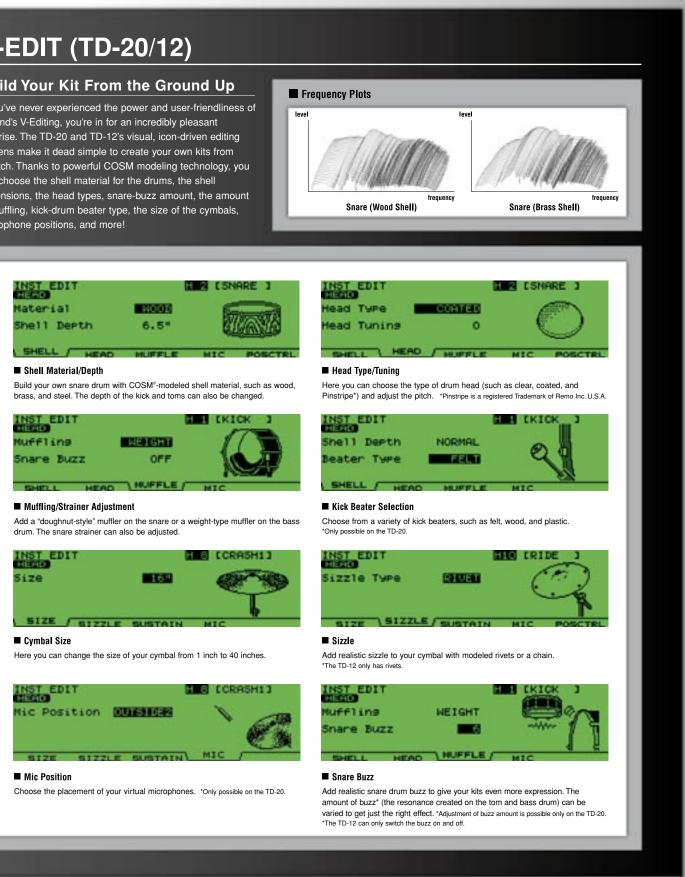

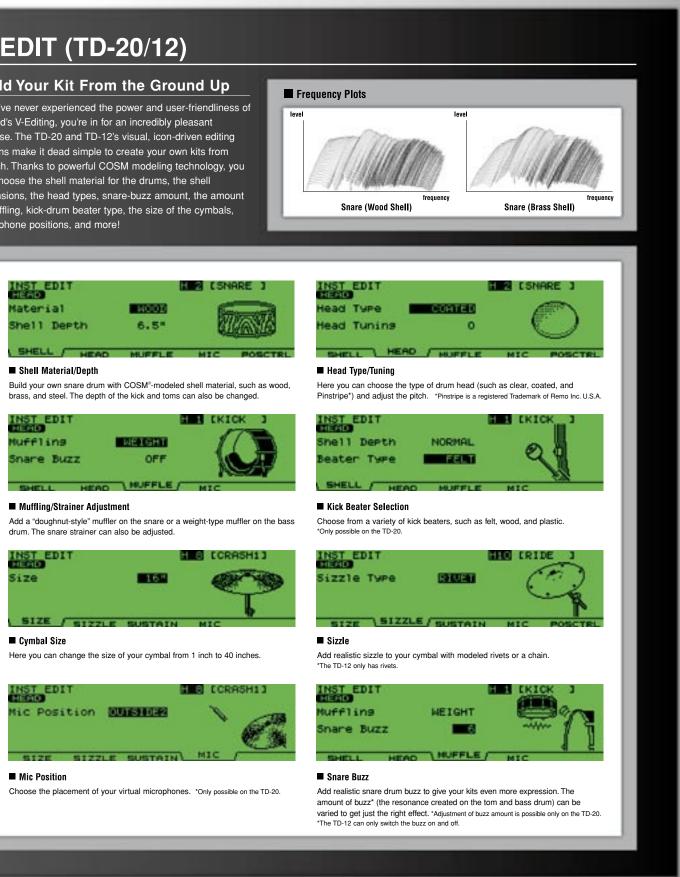

V-EDIT (TD-20/12)

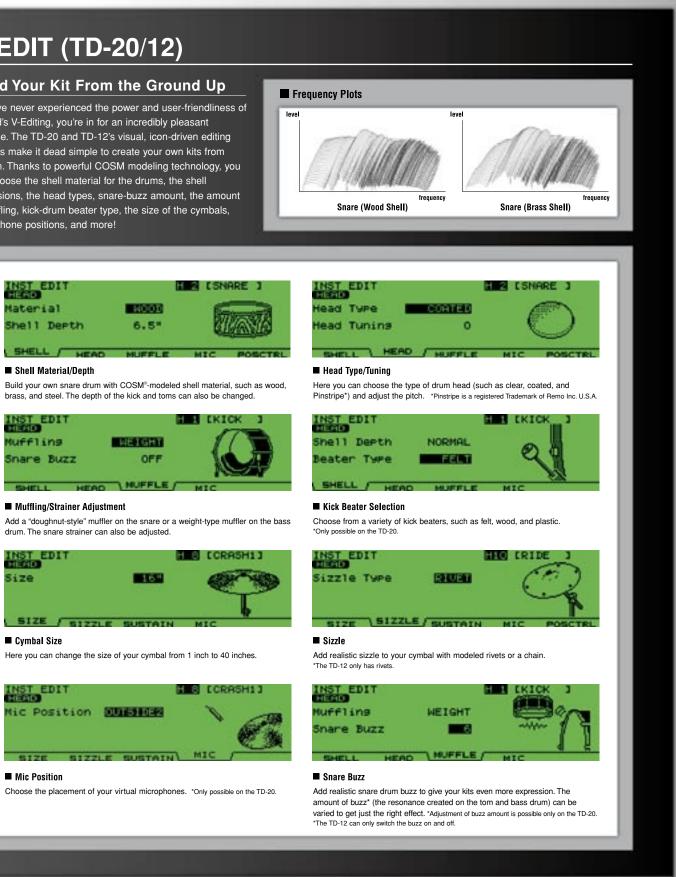

Build Your Kit From the Ground Up

If you've never experienced the power and user-friendliness of Roland's V-Editing, you're in for an incredibly pleasant surprise. The TD-20 and TD-12's visual, icon-driven editing screens make it dead simple to create your own kits from scratch. Thanks to powerful COSM modeling technology, you can choose the shell material for the drums, the shell dimensions, the head types, snare-buzz amount, the amount of muffling, kick-drum beater type, the size of the cymbals,

Roland V-Drums Innovation File No.01

Percussion Sound Module TD-20

The Best Sounds. the Most Expressive Performance

TD-20 is Roland's best-sounding percussion module ever, with over 500 sounds, plus superb dynamic range when used with the PD-125/105 V-Pads and VH-12 V-Hi-Hat®. Superior sensitivity lets drummers play more naturally and without having to adjust their playing technique. Rimshot and bass drum sounds can be varied depending on how they are played, and with Roland's interval control technology, drummers can create more realistic snare rolls and cymbal swells.

Advanced V-Editing

The modeling-based V-Editing starts from careful analysis of an entirely drum sounds. Drummers are free to change parameters such as cymbal size, type of "sizzle" (e.g. rivets or chain), and microphone position. Several types of kick beaters can also be selected, including felt, wood, and plastic. For the hi-hat, you can also add a tambourine. The TD-20 can even model snare "buzz" (the resonance created on the tom and bass drum) for startling realism.

Enhanced Performance Features

Eight group faders let drummers adjust the mix balance of the kit's components, while 15 Pad Compressors and EQs make shaping sounds easy. There's also a 6-part sequencer loaded with preset backing patterns and plenty of room for your own, plus onboard effects such as Ambience and a Mastering Room for adding compression and EQ to the overall sound. A choice of 10 analog outputs and a S/PDIF digital output offer plenty of options when mixing live or in the studio. It also has 15 dual trigger inputs, so if you own a standard TD-20K drum kit, you have four extra inputs to add more pads.

Convenient CompactFlash Storage and More

The CompactFlash slot can be used for storing custom drum kits and sequencer patterns with optional memory cards. An expansion bay located on the underside means there's room for upgrades down the road. The TD-20 also features Roland's V-LINK technology. Using an optional DV-7PR Video Presenter from Edirol, drummers can trigger images or change cameras from the pads or kick.

Unbeatable Sound

With the same stunning sound quality as the flagship TD-20, the TD-12 drum module provides hundreds of expressive instruments and play-along sequences in a streamlined, affordable package. Many of the sounds in the TD-12, from drums to cymbals, are COSM[®] modeled for the ultimate in expression and realism. The module provides the same large, icon-based LCD as its big brother (the TD-20), and is housed in a road-tough, metallic black chassis with a friendly array of buttons, controls, and mix sliders. Twelve trigger inputs are provided, plus four audio outputs and MIDI I/O.

Unrivaled V-Editing

Enjoy the dozens of expert-programmed kits in the TD-12 from authentic acoustic sets to ultra-modern electronic flavors. But the fun doesn't stop there; customize your snare drum, toms, bass drum, and cymbals with the modeling-based V-Editing. Change sizes and materials, attach sizzles to cymbals, add snare buzz, and more. Then get out your sticks and enjoy! The TD-12 supports positional sensing on the snare and ride, as well as on the toms when you play rimshots. The TD-12 is also brush compatible, and features the authentic Interval Control feature for the snare and ride/crash/china cymbal, which varies the sound in natural ways based on the speed of stroke repetition.

Tap Into a New World of Style and Groove

From rich studio kits to bombastic arena monsters, the TD-12 can deliver amazingly authentic drum and percussion sounds. Pop, rock, jazz, hip-hop, you name it — the TD-12 has you covered. But in addition to its acoustic-modeled kits, the TD-12 also offers a crop of edgy, fun, and experimental sets that have been created for unique, modern music creation. With an emphasis on fun, these kits are laced with colorful COSM processing, filter fluctuations, auto-roll effects, tap-sequence patterns, loop patterns, and more. Let the inspiration begin! And if you want to build your chops (or perhaps steal the show), fire off one of the 150 patterns built into the TD-12 and play along.

Percussion Sound Module TD-9

Guick Red/ Bonge Ambience USB

Experience the performance power of V-drumming

Over 500 high-quality sounds are built into this impressive sound module. With the ability customize snare tuning, muffling, cymbal size, sustain, and more, you can create your own personalized drum kits. Another great feature of the TD-9 is its ability to incorporate audio data in its 50 backing songs for realistic and inspiring playback. Enjoy practicing with backing songs sourced from first-class musicians. The Quick Rec/Play function is a great way to gauge to your performance; a single button enables recording and playback of playing during minus-one accompaniment.

Easy-to-use interface with Scope feature

With its clean, friendly panel layout, the TD-9 is a breeze to use at home and onstage. In addition to its illuminated buttons, the stylish front panel contains a large and easily readable LCD that displays sound, tempo, and other vital information. When the Scope function is activated, the LCD graphically shows the timing of your performance. With both visual and aural reference, you can more effectively cultivate and maintain the rudimentary skills essential to drumming.

Unique features that only V-Drums provide

The TD-9 beautifully conveys the dynamics and nuance of your playing with features such as 3-way triggering on the V-Cymbal ride and support for rim shots on toms and snare. Other features enhance performance, such as the USB connector, which lets you incorporate audio data (wav files) great for "one-man-band type" performances. You can also use the USB port to save data externally. The TD-9 is equipped with a metronome function and a Mix input to enable practice with songs from CD or digital-audio players. Inputs are also provided for adding pads and triggers* for a personalized setup.

*While the TD-9 uses a dedicated pad-input connector cable, there are also separate expansion jacks for two other trigger-input types (CRASH2, AUX).

Percussion Sound Module TD-3

Amazing Drum Sounds at Your Fingertips

The TD-3 Percussion Sound Module boasts 114 world-class drum and percussion sounds, and 32 kits – including separate head/rim triggering on the snare and bow/edge triggering on the hi-hat. It's also easy to use, so you can start playing right way. To find a drum kit, just use the Phrase Preview function, and a short demo will play. The TD-3 also comes with 15 types of built-in Ambience effects and compression, making it easy to enhance the overall sound quality.

Rhythm Coach Exercises and More

With Roland's Rhythm Coach onboard, drummers can improve their timing, speed, and endurance using seven types of rhythm training exercises with variations. It's a great way to hone your skills while having fun. The TD-3 also includes a stereo Mix input for playing along with external audio sources, plus MIDI In and Out for connecting with sequencers and other MIDI gear.

TD-3 Coach Mode List

Display	Parameter	level/type	Practice Content
гҺУ	Rhythmic Notes	3 types	An excellent warm-up exercise that also teaches note values. The metronome plays through a series of beat divisions every two measures, starting with half notes, up to 16th-note triplets, and then back down to half notes again.
Ech	Time Check	2 levels	Designed to develop good timing skills through visual use of the display. As you play along with the metronome, your performance is measured against the timing of the click, and the result is displayed.
9[E	Quiet Count	6 types	A timing exercise designed to develop "internal" timing. The metronome will play at the set volume for the first 1, 2, 3, 4, 6, or 8 measures, then play the second 8 measures at a reduced volume, challenging you to maintain the proper tempo throughout.
SPJ	Speed Check	2 levels	Similar to Time Check, except that the metronome advances five beats per minute whenever a rhythm is played for eight measures with the correct timing. This continues until the metronome's maximum tempo is reached.
Gud	Gradual Up/Down	2 types	Designed to build stamina by increasing the metronome one beat per minute every two beats until the maximum tempo is reached. The tempo then decreases in the same manner and the process repeats.
Sud	Step Up/Down	3 types	Designed to develop playing endurance by increasing the metronome's tempo five beats per minute every eight measures until the maximum tempo is achieved. The tempo then decreases in the same manner and the process repeats.
Ent	Count In	_	A "voice count-in" function that can be very useful for practicing. There is also a visual measure counter in the display.

V-Pad PD-125BK / PD-125WT

Our Most Sensitive V-Pads Ever!

How do you improve upon the world's most popular electronic percussion pads? Start by designing a sensor mechanism for more accurate triggering, and then give 'em a cool black or white finish! The 12-inch PD-125BK/PD-125WT and 10-inch PD-105BK/PD-105WT mesh V-Pads

V-Pad PD-85BK / PD-85WT

Rimshot-Ready Mesh Pads

The 8" dual-zone V-Pads feature Roland's latest dual-triggering technology, resulting in more consistent and accurate sensing between the head and rim. Built tank-tough and ready to take a pounding, these pads are available in black or white finishes with chrome brackets. When used as tom-toms for the TD-20 and TD-12 sound modules, the pads let you play rimshots, and the sound will change depending on the strength of your stroke.

Mesh Replacement Heads MH-12/10/8

Patented V-Drums Mesh Heads

These replacement mesh heads (developed in partnership with REMO[®] USA) are designed to perfectly fit Roland's full range of V-Pads. *Available as replacement parts.

Roland V-Drums Innovation File No.02 V-Pad & V-Kick Trigger Pad

Roland proudly offers the best-feeling drum pads in the business. Experience the comfortable feel of our patented mesh-head pads, and enjoy the realism and quiet action that these pads provide. For the utmost in personalization, the head of each pad can be tensioned to your taste, just like real drums. And speaking of quiet comfort, the V-Pads' rims are rubber-coated to keep rimshots as quiet as the mesh.

V-Pad PD-105BK / PD-105W1

both feature Roland's latest dual-triggering technology, resulting in more even and accurate sensing between the head and rim. They are also the first V-Pads with rimshot capabilities on the toms - including the actual "rim click" SOUND*. *Rim triggering on toms requires TD-20, TD-12 or TD-9 Percussion Sound Module.

V-Pad PDX-8

Improved V-Pad for Snare

Roland's mesh V-Pad (PDX-8) offers an expanded 10-inch rim and wider playing area. It separates head and rim triggering for authentic performance.

Dual-Trigger Pad PD-8

The Rock-Solid, **Fast-Action Pad**

This durable 8.5 inch rubber pad offers super-accurate triggering and a time-tested design for years of reliable use. The PD-8's dual-trigger capabilities make it perfect for triggering rimshots on the toms or bow/edge sounds on the hi-hat when used with the Roland TD-series percussion modules*. *The TD-3 does not support head/rim triggering on the toms.

What is a mesh head?

very durable, and provides a remarkably

having to worry about sore wrists.

natural touch, just like an acoustic drum head.

Now you can practice in silence without ever

Mesh drum pads have the distinct advantage of being quiet and realistic in

V-Kick Trigger Pad KD-120BK / KD-120WT

Natural Triggering with Double Pedal Support

Roland's time-tested KD-120 V-Kick Trigger Pad, is available in black or white finishes to complement the rest of the pads. The 12" V-Kick Trigger Pad offers fast, natural kick-drum triggering, and is compatible with double-bass pedals (sold separately).

V-Kick Trigger Pad KD-85BK / KD-85WT

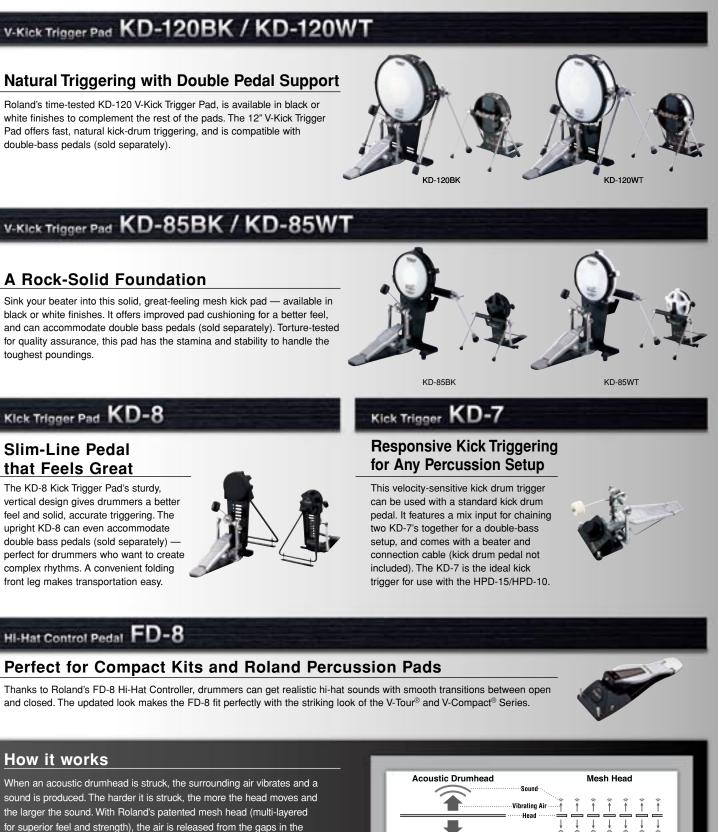

A Rock-Solid Foundation

Sink your beater into this solid, great-feeling mesh kick pad - available in black or white finishes. It offers improved pad cushioning for a better feel, and can accommodate double bass pedals (sold separately). Torture-tested for quality assurance, this pad has the stamina and stability to handle the toughest poundings.

Kick Trigger Pad KD-8

Slim-Line Pedal that Feels Great

The KD-8 Kick Trigger Pad's sturdy, vertical design gives drummers a better feel and solid, accurate triggering. The upright KD-8 can even accommodate double bass pedals (sold separately) perfect for drummers who want to create complex rhythms. A convenient folding front leg makes transportation easy.

HI-Hat Control Pedal FD-8

How it works

Perfect for Compact Kits and Roland Percussion Pads

When an acoustic drumhead is struck, the surrounding air vibrates and a sound is produced. The harder it is struck, the more the head moves and the larger the sound. With Roland's patented mesh head (multi-layered for superior feel and strength), the air is released from the gaps in the mesh fabric, so the surrounding air does not vibrate. This is what makes a mesh head so quiet.

Roland V-Drums® Innovation File No.03 & 04

Roland V-Drums Innovation File No.03

Advanced Sensor Technology for Ultimate Realism

In creating the world's finest modeled hi-hat, Roland embarked upon a time-intensive mission to create a virtual hi-hat that would perform like the real thing. The winning formula features three different types of sensors on the top of the cymbal's bow, the edge, and in the center of the bottom cymbal where it detects the foot pedal movements. Sophisticated triggering data, such as the distance

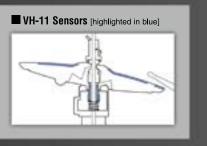

between the top and bottom cymbals, are detected by having the three sensors working perfectly in sync. The end result is amazing playability and realism, with the same nuances and tonal coloration of an acoustic hi-hat.

VH-12 Technology in a Compact, One-Piece Format

Derived from the groundbreaking VH-12 hi-hat, Roland's VH-11 combines two hi-hat cymbals into one with an ingenious one-piece floating design. Amazingly, it performs like a real hat, and provides a realistic up/down pedaled response thanks to the stationary base mounted below the cymbal pad. With the combination of two sensors on the bow and edge, plus a motion sensor unit mounted in the center, subtle nuances

(including foot movement) can be achieved. The one-piece design makes for easy setup on conventional hi-hat stands.

V-Cymbal

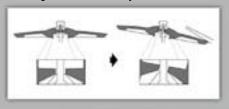

V-Hi-Hat

Roland V-Drums Innovation File No.04

Quest For the Perfect V-Cymbal

Developing the ultimate electronic cymbal required the Roland design to create numerous prototypes comprised of a wide range of materials. After extensive research, the team arrived at the perfect combination of internal and exterior materials that are durable and can properly simulate the resistance and swing amount that drummer's feel when an acoustic cymbal is struck.

Swing Mechanism of V-Cymbals

The Technology Within

What may look like a simple rubber/plastic disc is actually a sophisticated slice of cutting-edge technology. Inside the V-Cymbal's bell and edge is a thin film-like sensor that lies beneath the rubber playing surface. The sensors detect sticking position, velocity, and edge pressure (for cymbal choking). This complex detection and calculation happens instantly, providing drummers with a realistic and accurate playing experience. A small but important Roland design principle is that the cymbals are not completely round, which minimizes vibration that can cause mis-triggering.

V-Cymbal Explained (CY-15R)

Ultra-sensitive sheet-like sensors (shown in blue) are located beneath the bell and the edge. Under the bow area is a sensor for detecting the strength and location of the impact.

* V-Cymbal Technology for use under one or more of U.S. Pat. Nos. 6,632,989 / 6,881,885 U.S. Patent Pending

V-Hi-Hat VH-12

The First Electronic Hi-Hat, Designed Like an Acoustic

Wow! That's what you'll say once you try the VH-12 V-Hi-Hat. This breakthough electronic hi-hat is designed to precisely model the look and feel of its acoustic counterpart. So much so, it mounts on an acoustic hi-hat stand! The VH-12 uses top and bottom cymbals with full motion capability for ultra-natural stick/pedal work, and is designed to

V-HI-Hat VH-11

1

Realistic Feel, Streamlined Design

With eyes closed, drummers will think they're playing a regular two-piece hi-hat. But examine the innovative VH-11 floating hi-hat, and you'll see that it's actually comprised of one floating cymbal pad atop a fixed lower base. Great for fast setup and easy transport, the VH-11 mounts on conventional hi-hat stands, and provides a similar playing feel to a 2-piece hi-hat. The VH-11 is fully compatible with Roland's TD-20, TD-12, TD-9, and can be used with the TD-10 w/TDW-1, TD-8, TD-6V. and TD-6.

V-Hi-Hat®

work with the TD-20/12's enhanced dynamics. The dual-trigger VH-12 creates smooth hi-hat sounds from open to closed — including the half-open position — with all of its delicate nuances. By applying pressure to the pedal (even after closing), you can vary the pitch and decay for playing fast and tight articulations.

V-Cymbals®

V-Cymbal Ride CY-15R

Natural, Three-Way Triggering and Swinging Motion

The CY-15R V-Cymbals Ride is a 15-inch cymbal that offers natural swinging movement and ultra-dynamic three-way triggering (edge/bow/bell) when used with the TD-20, TD-12, and TD-9, making this the most expressive electronic cymbal ever designed. With edge/bow or bow/bell output jacks, this cymbal can be used as a ride cymbal or large crash cymbal, expanding the possibilities of any Roland drum system.

V-Cymbal Crash CY-14C

This Crash Cymbal Really Swings!

The CY-14C V-Cymbals Crash is a 14-inch crash cymbal featuring the same dimensions and natural movement of an acoustic cymbal. A dual-trigger system with individual sensors for the edge and bow gives you more dynamic response, allowing for expressive cymbal "chokes." Concentrated mass around the rim ensures uniform sensing whenever the cymbal is struck.

V-Cymbal Ride / Crash CY-12R/C

Compact, Triple-Trigger Cymbal

This 12-inch electronic cymbal brings breakthrough V-Cymbal technology to a very affordable price point. This expressive 3-way trigger* cymbal offers the natural rebound, inertia, and natural "swinging" motion of an acoustic cymbal, plus cymbal choke capabilities. Use it as crash or a compact ride cymbal. *3-way triggering is capable when used with the TD-20, TD-12 and TD-9 sound module.

Dual-Trigger Cymbal Pad CY-8

Dual-Trigger Cymbal with Choke Control

Sporting a refined look that more closely resembles an acoustic cymbal, the CY-8 Dual-Trigger Cymbal Pad offers precise and accurate triggering for both crash and ride purposes - complete with natural "swinging" motion and cymbal "choke" capability.

Dual-Trigger Cymbal Pad CY-5

Improved Cymbal Pad for Hi-Hat or Splash

The cymbal pad (CY-5) features a 12-inch playing zone and swing movement for more drummer-friendly triggering. The pad also provides separate bow and edge triggering. The CY-5 can be also used as an additional cymbal pad, such as a splash, on V-Drums kits.

	Size	Trigger (playing area)	Choke	Position Sensing

Drum Stand MDS-20BK

Ergonomic Design and Striking Looks

Roland's MDS-20BK Drum Stand offers a stylish curved look that keeps everything within reach. All cabling is hidden neatly inside the tubing, and the hardware is extremely durable, thanks to aluminum T-fittings. The raked design is perfect for mounting additional pads, such as VH-12 V-Hi-Hat® or SPD-S using optional stands. And changing the height is quick and easy; vertical adjustments with quick-release cam levers are provided on each of the stand's legs and the two cymbal stands, allowing the tiers to remain in place.

Solid, Stylish Stands With Simple Set-Up

Form and function unite in Roland's tough, attractive MDS-series drum stands. Adding to the sleek, clean appearance are concealed cables inside the tubes of the MDS-20BK and MDS-12BK. Both stands are constructed of sturdy steel pipes. The MDS-20BK features a quick-release cam lever to adjust height. The more affordable MDS-3C can be folded up with pads and sound module mounted for portability and storage convenience.

Drum Stands

Drum Stand MDS-12BK

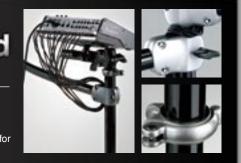

Solid, Stylish Drum Stand

Mount your V-Drums[®] in style and stability with the MDS-12BK. Featuring Roland's sturdiest grip clamps, this rock-solid rack let's you play with confidence, knowing that your drum and cymbal pads will remain locked in position. For a clean appearance and quick setup, the cabling can be concealed inside the pipes. The MDS-12BK's open-leg design makes hi-hat placement more convenient, and its wide design lets you to easily expand your kit with additional drum, cymbal, and percussion pads. Optional PM-30 Satellite speakers can be mounted on the center poles without the need for boom clamps (speaker bases are required).

Drum Stand MDS-3C

The MDY-10U is a flexible, sturdy cymbal mount for V-Cymbal Pads or a BOSS DB-90 metronome. Its foldable design makes set up and teardown a snap. The MDH-10U is a rock-solid pad mount that's also friendly for setup and teardown. It holds V-Pads and Trigger Pads.

Personal Monitors and Headphones

Personal Monitor Advanced Amplification for V-Drums* PM-30

Advanced Amplification for V-Drums

The PM-30 is a 2.1-channel advanced speaker system. With 200 watts of Class-D power, a high-performance 12" woofer with tweeter, a pair of 4" satellite speakers, and a proprietary DSP engine, the PM-30 delivers powerful, full-range sound in a convenient and portable package. The selectable Full-Range and Subwoofer modes let you customize low-frequency performance, while the built-in 3-band EQ lets you fine-tune the tone. A solid crossbar spans the top of the base unit for convenient carrying. The satellite speakers can be clamped onto the crossbar or mounted onto a drum rack.

Headphones

High-quality headphones faithfully reproduce the powerful, dynamic sound of V-Drums.

Stereo Headphones RH-300

Roland's top-of-the-line headphones for the ultimate in sound guality. appearance, and performance. The 45mm (1-13/16") drivers and neodymium magnets deliver dynamic, full-range performance. The snug fit shuts out external sound.

Stereo Headphones RH-D30

Optimized for high-impact onstage performance, RH-D30 headphones are light and comfortable with superior isolation, powerful and clear sound, and a super-wide frequency range. Other features include high-capacity 45mm (1-13/16") drivers and 180-degree rotating earpieces (90-degrees transverse). Carrying pouch included.

Open-Air Headphones RH-A30

Roland's new open-air-type headphones are made for musicians who don't want total isolation from surrounding sounds. For maximum comfort during extended sessions, the RH-A30's ear pads have been newly designed.

Stereo Headphones RH-200 / RH-200S

With 40mm (1-5/8") drivers, the RH-200/RH-200S headphones offer the clarity, sonic accuracy, and comfort needed for mixing and silent practice. They also feature a gold-plated 1/8-inch stereo connector with 1/4" adapter

Stereo Headphones RH-D20

Similar in design to the RH-D30, the RH-D20 has 40mm (1-5/8") drivers. Lightweight and comfortable for extended wearing, the RH-D20 provides superior sound isolation, balanced sound across the frequency spectrum, and 180-degree rotating earpieces for single-ear monitoring (90-degrees transverse). Carrying pouch included.

Roland Inner Ear Headphones RH-iE3

These attractive in-ear headphones feature aluminum housings, gold-plated plugs, and advanced drivers for a balanced, full-range sound with deeper bass and extended frequency performance. Longer shaft arms ensure easy mounting and detaching.

Accessories

Prevent your drum components from slipping while simultaneously safeguarding your floor from scratches and reducing impact noise/vibration. Roland's TDM-10 and TDM-20 heavy-duty drum mat is adorned with the Roland V-Drums logo. The mat is available in medium and large sizes.

SPECIFICATIONS

(TDM-20) • Dimensions 1,600 (W) x 1,500 (D) x 8 (H) mm/ 63 (W) x 59-1/16 (D) x 0-3/8 (H) inches • Weight 3.0 kg/ 6 lbs. 10 oz. (TDM-10) • Dimensions 1,200 (W) x 1,300 (D) x 8 (H) mm/ 47-1/4 (W) x 51-3/16 (D) x 0-3/8 (H) inches • Weight 2.1 kg/ 4 lbs. 11 oz.

RT-10 Series Acoustic Drum Trigger

Triggers for Kick, Snare, and Toms

With acoustic-drum triggering more popular now than ever, Roland has responded to requests from the market and created these triggers: the RT-10K (for kick drums), RT-10S (for snare drums), and RT-10T (for toms). Physically smaller than their predecessors, the RT-10 series triggers are easier to position. Best of all, they feature trigger-sensing technology for improved response.

RT-10K (Kick Trigger)

• Trigger: 1 (Head) • Connector: Trigger Output Jack (1/4 inch Phone • Dimensions: approx. 40 (W) x 110 (D) x 70 (H) mm / 1-5/8 (W) x 4-3/8 (D) x 2-13/16 (H) inches • Weight: 90 g / 4 oz • Accessories: Connection Cable, Hoop Guard • Guide for Installation: Rim Height: 30 to 36 mm / 1-3/16 to 1-7/16 inch, Rim Thickness (Max.): 13 mm / 9/16 inch

RT-10S (Snare Trigger)

• Triggers: 2 (Head, Rim) • Connector: Trigger Output Jack (Stereo 1/4 inch Phone Type) • Dimensions: approx. 40 (W) x 110 (D) x 50 (H) mm / approx. 1-5/8 (W) x 4-3/8 (D) x 2 (H) inches \bullet Weight: 80 g / 3 oz · Accessories: Connection Cable · Guide for Installation: Rim Height: 11 to 15 mm / 7/16 to 5/8 inch

RT-10T (Tom Trigger)

• Triggers: 1 (Head) • Connector: Trigger Output Jack (1/4 inch Phone Type) • Dimensions: approx. 40 (W) x 110 (D) x 50 (H) mm / 1-5/8 (W) x 4-3/8 (D) x 2 (H) inches \bullet Weight: 80 g / 3 oz \bullet Accessories: Connection Cable . Guide for Installation: Rim Height: 11 to 15 mm / 7/16 to 5/8 inch

TMC-6 Trigger MIDI Converter

Play MIDI Modules From an Acoustic Set!

The TMC-6 Trigger MIDI Converter makes it easy to play and trigger MIDI modules and samplers from an acoustic drum set, or expand the sound palette of electronic drum sets. This affordable device uses accurate and reliable V-Drums triggering technology, allowing acoustic drummers to "play" electronic sounds from their favorite MIDI module, or for V-Drums owners to expand their trigger inputs.

Works Great with the RT/TD-Series

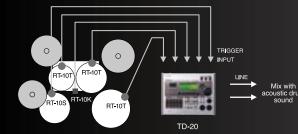

The TMC-6 Trigger MIDI Converter makes it easy to play and trigger MIDI modules and samplers from an acoustic drum set equipped with Roland's RT-series triggers, or to expand the sound palette of electronic drum sets. This affordable device uses the lightning-fast triggering technology of Roland's V-Drums for reliable triggering and super-accurate dynamics.

Supported Sound Modules: TD-20, TD-12, TD-9, TD-3, SPD-20, SPD-S

* If you need dual triggering for head and rim on toms, please use the RT-10S instead of the RT-10T. arding the sound ule with dual trigger compatible input, please refer to "Sound Module and Drum Pad Combinations" on the pages 38 - 39 of this catalog.

Using the RT-10 Series and TMC-6

By connecting a set of RT-10 Series triggers to a TD-Series brain, drummers can play high-quality V-Drums sounds right from an acoustic set, or blend electronic and acoustic sounds to create unique sounds. Using the TD-series' Tap Sequence function, drummers can trigger sequences by simply tapping the kick

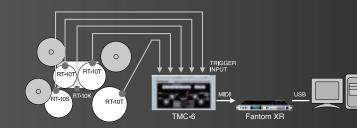

PCS-31L Connection Cable (on

Trigger an SPD-Series module

In this example, an RT-10K and RT-10S are connected to an SPD-S Sampling Pad, making this an affordable and easy way to add sampling to an acoustic set. Using the SPD-S's Velocity Switch setting, the snare and bass drum can be set to trigger a different sample depending on how hard they are hit.

SPD-S

Connect a MIDI module and computer

Roland's TMC-6 Trigger MIDI Converter changes the trigger impulses received from the RT-10 series into MIDI messages — making it possible to play MIDI modules such as Roland's Fantom XR, or even record your performance into a sequencer. This expands sonic flexibility, and allows you to create more natural drum tracks when sequencing in the studio.

Trigger MIDI Converter

6 Trigger Inputs for Maximum Versatility

The TMC-6 includes six trigger inputs compatible with all Roland drum pads or acoustic drum triggers (an FD-8 Hi-Hat Control Pedal can also be connected). With V-Drums technology built-in, the TMC-6 provides reliable and fast response, plus separate head/rim triggering with dual-trigger V-Pads, such as the PD-125/105/85, and 3-way triggering with the CY-15R and CY-12R/C V-Cymbals. Trigger settings can be stored to 12 user-memory locations.

The TMC-6 is also a great way to expand the capabilities of any V-Drums set. Simply connect the TMC-6 to a TD-Series brain via MIDI, and use the TMC-6's trigger inputs to connect more pads and cymbals. In this example, three pads and two cymbals are connected for triggering splash cymbal sounds and percussion instruments such as timbales and cowbell

Rhythm Coach RMP-Series

The Self-Contained Rhythmic Workout Station

Put yourself on the fast track to rhythmic improvement with the RMP-3 and RMP-5. These state-of-the-art electronic rhythm pads look good, feel good, and are loaded with fun exercises and timekeeping tools to build your chops. With tunable mesh drumheads, built-in metronomes, large LCDs, renowned Roland Rhythm Coach interactive lessons, and integrated one-piece molded bodies, the RMP-series offers the utmost in portability and convenience.

Rhythm Coach RMP-5

Flagship Rhythm Coach with Built-in Sounds

Comfortable, Quiet Mesh Head

The RMP-series pads are outfitted with a great-feeling, tunable mesh drumhead for realistic and quiet performance. Just like on an acoustic drum, the RMP's head can be adjusted for tension. The result is a true acoustic feel, but without the noise. By plugging in headphones, drummers can enjoy silent, concentrated practice without disturbing others.

Fun, Friendly Features

The large LCD provides easy-to-read instructional information, complete with a smooth-flow onscreen tempo meter that bounces from side to side. Large buttons and a clearly labeled front panel simplify operation. Each RMP has a built-in speaker for the metronome sounds, and a Mix In jack for playing along with external audio. Use the RMP on your lap, a tabletop, or best of all, with Roland's convenient PDS-2 stand (optional).

- Your Own Personal Rhythm Coach Included

The RMP-series is equipped with Roland's famous Rhythm Coach exercises, which challenge and score your playing in fun and friendly ways. Put your skills to the test with Time Check, Auto Up/Down, and Stroke Balance, for example, to help develop consistent stick technique. Adjust the workout level according to your abilities and goals.

TIME CHECK
In sync with the metronome, this exercise encourages you i strike with accuracy. The display informs how accurate your was in seven levels.

Dr. Beat DB-90

Better Features, Better Practice

The Note Mixing function allows you to instantly create a variety of beats by adjusting the levels of five different note values. Front-panel sliders, buttons, and a large rotary dial provide instant, hands-on access to edit parameters. Select four different click sounds, including a human voice-counting sound that will help you know your place in the bar. The DB-90 is also equipped with realistic PCM drum patterns for developing accuracy and rhythmic feel effectively. It can also be synced to external MIDI sequencers for elaborate accompaniment

Practice Conversion Kit PCK-1

32

33

Turn Your Snare Drum Into a Practice Pad The PCK-1 can convert an acoustic snare drum into a silent practice pad. It comes with a 14-inch mesh drum head that offers the same natural response as Roland's famous V-Pads, plus a rubber rim silencer for ultra-quiet playing. An RT-5S Snare Trigger is also included, allowing

Rhythm Coach, Dr. Beat Expanded Features with the RMP-5 Great Sounds Onboard! Breaking the boundaries of pre-existing practice pads, the RMP-5 includes 54 of Roland's finest snare, kick, hi-hat, cymbal, and percussion sounds for you to play. It also provides an assortment of metronome sounds, including a standard click, human-voice count, rhythmic patterns, and more, Connect Kick & Cymbal Pads The RMP-5 provides a dual-trigger input that can be used to connect a Roland kick trigger and a cymbal pad, such as the KD-8, CY-8, etc (optional), All together, these three components form the nucleus of a small electronic drum kit. Now you can train not only your hands, but your feet as well. cymbal pad connected to the RMP-5, you can build your own custom drum kit by assigning which internal sound you'd like to play on each pad.

RHYTHMIC NOTES

This provides basic training by changing the rhythm type every two measures. Useful for warm-up, this exercise helps you

STROKE BALANCE

The onscreen metronome needle indicates how strong you play Improve balance and accent skills for both hands.

QUIET COUNT

Designed to develop your internal tempo, this exercise alternates the volume level between normal and barely audible, challenging you to maintain the correct tempo throughout.

AUTO UP/DOWN

An endurance exercise that gradually increases and then decreases the click speed. The rate at which the tempo goes up and down is adjustable, and you can set the maximum tempo at which it starts decreasing.

New Sounds

An all-new collection of sounds has been created for the HPD-10; approx. 400 high-quality instruments are onboard. All of the percussive essentials have been included - congas, bongos, tabla, djembe, cajon, etc. - as well as melodic percussion, drum kit, special effects, and more. No matter the genre, from ethnic to electronic, the HPD-10 has you covered.

Sensitive Surface

Whether you're laying down the most delicate finger rolls or the sharpest slaps, the HPD-10's playing surface can handle anything you give it. The comfortable round surface is divided into ten individual pads with pressure and positional sensitivity. The popular D Beam is also included for dramatic triggering and pitch control. Strike a virtual gong with your head, and control the pitch of a talking drum with your hand waving up/down — you get the picture.

Easy Operation

The PRESET KITS buttons give you quick access to five specially selected kits ----Conga, Tabla, Steel Drum, Drums, SFX, and five of your favorite kits. The large, backlit icon-driven LCD helps you clearly see what you are playing or editing.

PRESET KITS Button

Style Guide Metronome

The HandSonic 10 has a new type of metronome that provides a musically inspiring selection of rhythm patterns based on a variety of styles - Latin, World Music, Rock, Pop, Jazz, Dance. It helps you not only for practice, but also for sessions as play-along patterns.

Effects & Controller

Dual-trigger input allows a kick pedal and cymbal pad (or footswitch) to be plugged in

3.5

Wave your hands over the invisible D Beam to trigger and control sounds with visual impact.

* Actual D Beam is invisible; color has been added for illustration purposes only

Digital Percussion

SPECIFICATIONS

• Pad 10 inches, 10 sections, Pressure-Sensitive • Instruments 410 • Kits 64 • Effects Ambience (5 types), Multi-Effects (20 types), • Style Guide Metronome 86 patterns • Tempo 40-200 • Coach Mode OUIET COUNT, RHYTHM OHECK, TIME CHECK, PAD FOLLOW, AUTO UP/DOWN, TAP TEMPO • Controllers D Beam Controller, Control Knob • Display (con-driven Backlit LCD • Connectors Output Jacks (L/MONO, R), Phones Jack (stereo phone type), Mix In Jack (stereo phone type), Trigger Input/Foot Sw Jack (Dual), MIDI Connectors (IN, OUT) • Output Impedance 1.0 k ohms • Power Supply AC Adaptor (DC 9V) • Current Draw S50 mA • Dimensions 323 (W) x 427 (D) x 75 (H) mm / 123 via inches (W) x 161-3/16 (D) x 3 (H) inches • Weight 2.9 kg / 6 lbs 7 oz (excluding AC Adaptor) • Accessories Owner's Manual, AC Adaptor (ACI/PSB-IU Series), Label Sticker

Improve your skills with the advanced Rhythm Coavh function

Pad Follow

The "Pad Follow" lesson combines both audio and visual information. With a click playing in the background, a test pattern is played for you; at the same time, the pattern appears on the graphical pad display. Then it's your turn to copy what you just heard and saw

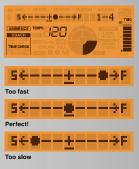

Develop your timing while expanding your pattern vocabulary. With a click track playing in the background, Rhythm Check plays a pattern and then asks you to repeat it, then advances to the next pattern.

Auto Up/Down

An endurance exercise that gradually increases and then decreases the click speed. The rate at which the tempo goes up and down is adjustable, you can set the maximum tempo at which it starts decreasing, and the minimum tempo at which it starts increasing.

Time Check Time Check teaches you to play with pinpoint precision. The 7-segment meter displays the accuracy of your performance is as you play.

This exercise is designed to develop your internal tempo. The volume of the click will alternate between normal and Quiet, challenging you to maintain the correct tempo throughout.

Тар Тетро

Tap a series of quarter-notes on any of the ten pads and the HandSonic 10 will calculate and display your new tempo in beats per minute. A handy resource!

HANDSONIC 15 HPD-15

The World's Most Popular **Hand-Percussion Pad**

The HPD-15 HandSonic is the world's most powerful (and famous!) electronic hand percussion multi-pad. It offers incredible triggering capabilities based on Roland's V-Drums® technology. Divided into 15 parts, the HPD-15 allows hand percussionists to play up to 15 sounds simultaneously with all the sensitivity that the V-Drums are famous for. There are 600 percussion sounds onboard derived from all over the world - including Latin and Asian countries, the Middle East, and Africa - plus electronic drums and sound effects!

Expressive Realtime Control

The HandSonic's powerful controllers can be used to modulate pitch, timbre, and other parameters in real time, and with the expressive D-Beam controller, percussionists can trigger the onboard sounds or alter an instrument's tuning simply by waving their hands over an infrared beam of light. Also included are two ribbon controllers, an Expression Pedal input, and three control knobs. An optional KD-7 Kick Trigger Unit or FD-8 Hi-Hat Control Pedal can also be connected.

HANDSONIC 15 SPECIFICATIONS

Total Percussion Pad SPD-20

Superb Sounds and Features

The SPD-20's sound set includes everything from ethnic and world percussion instruments to classic and modern acoustic and electronic drum sounds — 700 sounds total! Out of the box, you get 99 patches and six rhythm loops that can be played via eight high-quality pads with natural response — even when playing with common drumming techniques like rolls and flams.

Infinitely Expressive

Four external dual-trigger inputs make the SPD-20 compatible with a dedicated hi-hat or kick drum controller and any of Roland's drum pads (including V-Pads[™]). The trigger inputs can also be used with acoustic drum triggers for triggering acoustic drums. Other noteworthy features include a velocity-sensitive Layer function, onboard effects and MIDI connections for using the SPD-20 as a controller or sound module

Sampling Pad SPD-S

Add Sampling to Your Rig!

The SPD-S Sampling Pad is a simple and affordable way to tap into the power of sampling. Six pads and three edge triggers allow drummers to trigger CD-quality samples and create phrase loops complete with pro-quality effects.

Integrates Easily with Your Kit

The SPD-S is a great way to add sampling to any percussion setup, and it's easy - just record a sound, assign it to a pad, and go. Up to eight sounds can be played from the six rubber pads and three edge triggers. With room for 399 User waveforms, the SPD-S can store plenty of samples. Plus, there are 181 ready-to-play waveforms pre-loaded into User memory. A sampling CD is also included, making it easy to add more sounds.

Powerful and Expandable

With 30 multi-effects algorithms and a unique ambience effect, the SPD-S offers endless sound-sculpting potential - plus the ability to create loops with the Phrase Maker function. The SPD-S has a stereo input, and can accommodate up to two trigger units for playing a drum pad in either a head or head/rim configuration. And with MIDI In and Out, it makes a great controller as well. The SPD-S can be expanded with CompactFlash media, and can import or export WAV/AIF files.

Convenient CompactFlash Storage

The SPD-S works with readily available CompactFlash media — making it easy to expand the onboard sampling time, store custom sounds, and even import or export WAV/AIF files using your Mac or PC. *Please contact your authorized Roland dealer regarding compatibility of CompactFlash media.

																					-			1	

*pos.: Positional sensing is available.

*To enable rim shot, edge shot, bell shot and choking techniques, you'll need to connect the pad with the stereo cable.

*1 Does not support rim shots.

Does not support thin shots.
 Supports Drush sweep techniques.
 Supports brush sweep techniques.
 Connect to the BOW/EDGE output jack for edge shots; connect to the BOW/BELL output jack for bell shots.
 With two cables, you can perform using three different tones: bow, bell, and edge.
 With a Y-Cable (PCS-31L), you can connect two pads to a single trigger input jack. However, rim shots, choking and edge or bell shot on each pad or cymbal are not available for use.

*7 You need to set the "Input Mode" to "HD/RM" (or "H-r" in the RMP-5).

*8 With a Y-Cable (PCS-31L), rim shots are possible with other trigger inputs in addition to Trigger Input 2.

Wint a Fvalle (FVS-31E), finit study are possible with other ingger inputs in addition to ingger input z.
You need to select "PD-120" for trigger type settings.
Positional sensing on rim is available.
You the declared cables (RD/RDB), you can perform using three different tones: bow, bell, and edge.
Compatible with "PAD/RIM" dual-triggering feature in EXT TRIG mode.
TD-9 uses a dedicated D-Sub connection cable for input; separate Crash 2 and AUX inputs are also provided.

Sound Module and Drum Pad Combinations

V-Drums Lite HD-1

The All-In-One Kit For Every Home

The HD-1 is forged from the same technology as its V-Drums predecessors, but it's smaller, more affordable, and much simpler to use. It's also incredibly quiet, thanks to the newly designed kick beater, cushioned tom pads, and snare head. Most of the HD-1's components are mounted on one stand for easy setup and transport, and for a clean look. Just take it out of the box and play.

Great sound with complete volume control

The V-Drums Lite HD-1 has 10 carefully selected drum kits built in that inherit the powerful and expressive sound of flagship V-Drums kits. Thanks to the mesh-head snare, cushion tom head, and beaterless kick, the HD-1 enables noise-free playing with complete volume control.

Drum Kits

No.	Normal Kit	Variation Kit	
01	Acoustic	Jazz	
02	Power	Double Bass	
03	Drum & Percussion	World	
04	Electronic	Dance	
05	Voices	Droid	

Simple control, convenient functions

The HD-1's ease of use is exemplified by its friendly layout of knobs and buttons. No guessing, no hunting through menus - everything is clearly labeled and easy to access, including

handy features such as the built-in metronome and MIX-IN jack, which lets you incorporate digital-audio players into your practice and performances.

From setup to performance, the included DVD shows you how

To enhance the experience of setting up and playing the drums, Roland provides a DVD manual with each HD-1. The content covers everything from kit assembly and operational controls to drumming rudiments and playing techniques. This easy-to-understand guide is sure to help even absolute beginners get a fast start.

OPTIONS

Personal Drum Monitor PM-01

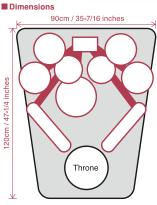

Monitoring the HD-1 through headphones is Monitoring the HD-1 through headphones is ideal for private practice, but when you want your drumming to be heard in the room, the PM-01 personal monitor is the ideal solution. It's small, great-sounding, affordable, and a perfect cosmetic match for the HD-1.

This handy drum accessory V-Drums owners, allowing them to start playing their V-Drums right out of the box.

43

Space-Saving Design

A distinguishing feature of the HD-1 is its small footprint. For a drum kit, it requires far less space than you would imagine. Including the throne, it only occupies 90cm x 120cm (35-7/16" x 47-1/4") of floor space. It fits perfectly in a corner of any room.

*Mat and throne sold separately

Learn more about V-Drums Lite on Roland.com! http://www.roland.com/V-Drums_Lite/ 🌐

On Roland's official website you'll find a wealth of information on the HD-1, including movies, practice pieces, a Room Layout simulator, and other useful items that you can download free of charge.

SPECIFICATIONS

SPECIFICATIONS
 · Kit Configuration Kick Pedal, Snare, Hi-Hat, Hi-Hat Pedal, Tom x 3, Crash, Ride • Drum Kits 10 • Preview Patterns 10
